

Swedish Tax Agency

Capacity building that takes account of the local context

What we do

Bilateral
Long-Term
Projects

Tax
Inspectors
Without
Borders

International
Capability
Building
Programs

Demand-driven with focus on the local context

Our concept

The ICBP in short

- Theme - Trust and Voluntary Compliance as a strategy for DRM.
- Four participating countries. Four program rounds. Four years.
- Each year - Officials from Tax Agencies and Ministry of Finance form a country team of six participants
- A coach from STA assigned to each team.
- The coach and the team meets digitally every second week, in addition to coach visits, workshops and study visits.

What the Program aims to achieve and how

What we aim for

Provide a tool for solving
complex Problems
- the PDIA -approach

Provide Insights and knowledge of
areas that are significant for **increasing Trust**
in the Tax system and thus **Voluntary Compliance**

Support in solving an
actual problems while
learning a method for
Problem-solving

How? The
design and
activities

Problem Driven Iterative Adaptation –
(method for problem-solving developed by Harvard
University)

Theory of Change

Assumption:

The increased Voluntary Compliance to pay taxes contributes to increased domestic resource mobilization.

Assumption:

The increased knowledge, capability and implemented measures will contribute to increasing citizens and companies trust in the tax administration and the tax system, and thus Voluntary Compliance.

Long Term - expected results

“Contribute to **Domestic Revenue Mobilisation** in the participating countries”

Medium Term - expected results

- “Contribute **to increased Voluntary Compliance** in the participating countries”

Short term – expected results

- “-The participants **develop capability to address problems** that hinder Voluntary Compliance and,
- **Progress in solving at least one such problem**”
