

Technical session II:

Taxation and the informal economy: lessons and best practices

Co-organised with the International Centre for Tax and Development (ICTD)

23 July 2025 09:15-10:45 EAT| Hybrid

Tax systems that work for people and advance the Sustainable Development Goals

Agenda

Time	Items	Speakers
09:15 – 09:20	Welcome and introduction	Regina Navuga , Tax Equity Manager Africa, International Budget Partnership (IBP)
09:20 – 09:35	Broadening the tax base and formalising the economy: what has worked and what hasn't?	Max Gallien , Research Lead, International Centre for Tax and Development (ICTD)
09:35 – 09:50	Country experience: risk-based registration, digitalisation strategies, targeting of higher income earners	Denis Mukama , Interim Commissioner, Strategy and Risk Analysis Department, Rwandan Revenue Authority
09:50 – 10:05	Q&A and open discussion	
10:05 – 10:25	Experiences from Latin American countries: formalisation strategies towards employment & social protection	Guillermo Montt , Social Protection Specialist, International Labour Organisation (ILO)
10:25 – 10:40	Q&A and open discussion	
10:40 – 10:45	Closing remarks	Regina Navuga , Tax Equity Manager Africa, International Budget Partnership (IBP)

2025 ATI General Assembly – Technical Session II

Taxation and the Informal Economy: Lessons from Rwanda's Perspective

July 23, 2025

Denis MUKAMA
Interim Commissioner for Strategy
and Risk Analysis, RRA

Call 3004

@rainfo

Rwanda Revenue Authority

Rwanda Revenue

HERE FOR YOU TO SERVE

Taxation of the Informal Economy in Rwanda

- RRA strategically implements measures to tax Rwanda's large informal sector by:
 1. **Adopting a risk-based taxpayer registration** approach
 2. **Streamlining taxpayer services and tax structures** to enhance ease of compliance
 3. **Leveraging digitalization** to strengthen detection and enforcement of informality
 4. **Prioritizing taxpayer outreach** and education
 5. **Investing in ongoing research and policy reforms** to address informality

Call 3004

@rainfo

Rwanda Revenue Authority

Rwanda Revenue

HERE FOR YOU TO SERVE

1. Risk-Based Taxpayer Registration

- RRA has shifted its approach from expanding the taxpayer registry to **growing the *active* tax base** by leveraging effective, risk-based registration and de-registration strategies
- Over 50% of CIT returns filed in 2013-2017 were nil returns – the **high incidence of “active ghosts”** in Rwanda was partially due to past ***Mass registration campaigns*** that included inoperative taxpayers, as well as the complexity of de-registration (RRA & ICTD, 2020)
 - ✓ RRA has digitalized and streamlined the de-registration process
 - ✓ RRA’s 2023/24 tax registry clean-up initiative effectively removed over 170,000 inactive taxpayers

Call 3004

@rainfo

Rwanda Revenue Authority

Rwanda Revenue

HERE FOR YOU TO SERVE

1. Risk-Based Taxpayer Registration

- RRA has successfully **expanded its active taxpayer base** by leveraging risk-based registration strategies to identify potential non-registered taxpayers
- **Risk rules are dynamically updated** to ensure they accurately and holistically capture informal taxpayers that are active and sufficiently large in scale, e.g.:
 - *Taxpayers registered in VAT but not CIT/PIT*
 - *Importers with CIF eligible for CIT/PIT registration*
 - *Local buyers that meet the VAT registration threshold*
 - *Taxpayers with pension contribution declarations but not registered in PAYE*
 - *Property owners but not paying property tax*
- Potential taxpayers identified for registration are targeted for **follow-up and compliance monitoring**
- Finally, newly registered taxpayers are offered **educational seminars** on their tax obligations

Call 3004

@rainfo

Rwanda Revenue Authority

Rwanda Revenue

HERE FOR YOU TO SERVE

1. Risk-Based Taxpayer Registration

- In 2023/24 alone:
 - RRA registered **96,915 new taxpayers** who contributed **RWF 9.74 billion (~USD 7 million)** in tax revenue
 - The Local Government Tax (LGT) register also expanded by **115,069 taxpayers**, reaching a total of **1,347,846** (9% increase)

*RRA conducted a tax registry cleanup in 2023/24 to de-register inactive taxpayers

2. Streamlined Services and Tax Structures

- RRA has prioritized **simplified tax procedures** to enhance compliance, including among informal and small businesses:
 - ✓ **User-friendly electronic tax services** – from registration and filing to payment and account management
 - ✓ **Integrated digital tax management system** accessible via mobile devices (MyRRA)
 - ✓ **Automated SMS and email alerts** to remind taxpayers of deadlines, notify them of penalties, confirm filings, and prompt action where needed

Call 3004

@rainfo

Rwanda Revenue Authority

Rwanda Revenue

HERE FOR YOU TO SERVE

2. Streamlined Services and Tax Structures

- Alongside streamlined services, RRA's tax structure is **designed to target higher-income earners** while protecting lower-income earners
- Back in 2020, **wealthy individuals paid lower effective tax rates** on their income than those earning employment income – often due to lower tax rates on income streams such as investment earnings (RRA & ICTD, 2020)
 - ✓ As of 2023, RRA has **updated the top PIT and PAYE thresholds** to ensure higher-income earners are taxed at higher rates proportional to their income
 - ✓ RRA has maintained **tiered CIT, PIT, and PAYE regimes** to enable simplified declaration processes for lower-income earners, while sustaining a **calibrated minimum threshold** (last increased in 2022)

2. Streamlined Services and Tax Structures

Tax Type	Previous Tax Rate		Current Tax Rate
PIT/CIT (Flat tax regime)			- Rwf 1 – 2,000,000: 0 - Rwf 2,000,000 – 4,000,000: 60,000 - Rwf 4,000,000 – 7,000,000: 120,000 - Rwf 7,000,000 – 10,000,000: 210,000 - Rwf 10,000,000 – 12,000,000: 300,000
PIT/CIT (Lump sum regime)			Rwf 12,000,000 – 20,000,000: 3%
PIT (Real regime)	Before Nov 2022: - Rwf 0 – 360,000: 0% - Rwf 360,000 – 1,200,000: 20% > Rwf 1,200,000: 30%	From Nov 2022 to Oct 2023: - Rwf 0 – 720,000: 0% - Rwf 720,000 – 1,200,000: 20% > Rwf 1,200,000: 30%	- Rwf 0 – 720,000: 0% - Rwf 720,000 – 1,200,000: 10% - Rwf 1,200,000 – 2,400,000: 20% > Rwf 2,400,000: 30%
CIT (Real regime)	Before 2023/24: 30%		28%
PAYE	Before Nov 2022: - Rwf 0 – 30,000: 0% - Rwf 30,000 – 100,000: 20% > Rwf 100,000: 30%	From Nov 2022 to Oct 2023: - Rwf 0 – 60,000: 0% - Rwf 60,000 – 100,000: 20% > Rwf 100,000: 30%	- Rwf 0 – 60,000: 0% - Rwf 60,000 – 100,000: 10% - Rwf 100,000 – 200,000: 20% > Rwf 200,000: 30%

Call 3004

@rainfo

Rwanda Revenue Authority

Rwanda Revenue

HERE FOR YOU TO SERVE

3. Digitalization Strategies

- RRA has harnessed digital tools to **detect informality and enhance compliance oversight**:
 - ✓ **Automated VAT input/output controls and detection of fictitious invoices** submitted via Electronic Billing Machines (EBMs)
 - ✓ **Automated revenue controls** on income tax declarations
 - ✓ **Dynamic dashboards to flag discrepancies** in taxpayer registration data, filing and payment outcomes, etc.
 - ✓ **Data matching and integration with third-party systems** to identify and register new taxpayers

Call 3004

@rainfo

Rwanda Revenue Authority

Rwanda Revenue

HERE FOR YOU TO SERVE

3. Digitalization Strategies

- To further strengthen digital oversight, RRA established its '**EBM for All**' policy in 2020
 - The policy requires all traders – including those not registered for VAT – to issue **EBM invoices**
 - EBMs provide **real-time visibility on taxpayer transactions and declared sales** across the formal and informal sectors
 - Since 2021/22, the number of **taxpayers using EBM rose by 52%**, largely driven by adoption among non-VAT registered firms

4. Taxpayer Outreach and Education

- RRA has prioritized **tailored taxpayer outreach and education**, focusing especially on raising awareness among small businesses, newly registered taxpayers, and informal actors
- Initiatives include:
 - ✓ **One Stop Service Center:** locations at RRA headquarters and at local centers
 - ✓ **Education & Sensitization seminars:** 120 tax education workshops held in 2023/24, exceeding the target by 20% (including risk-based sector, new policies, etc.)
 - ✓ **Communication campaigns:** 16 campaigns held in 2023/24 (Confirmed by RRA/ICTD study on effectiveness of communications and their strategies)
 - ✓ **Taxpayer Appreciation Month:** annual event to recognize top taxpayers nationwide

Call 3004

@rainfo

Rwanda Revenue Authority

Rwanda Revenue

HERE FOR YOU TO SERVE

5. Research and Policy Reforms

- RRA's efforts to curb informality are supported by **ongoing analysis and policy development**, including:
 - ✓ Statistical analysis of the existing **tax gap** in Rwanda
 - ✓ Research on the key sectors and emerging trends in **hidden economy activities**
 - ✓ Investigation of the **effective tax burden** in Rwanda – including formal taxes, social security contributions, and informal taxes and fees
 - ✓ Announced **tax policy measures** focused on boosting revenue while incentivizing formalization (e.g., by removing select VAT exemptions that benefit unregistered firms)

Simplified tax regimes with social security contributions

Lessons from Latin America to forge a path towards formalization

Guillermo Montt, ILO Social Protection Specialist

Many countries in the region have introduced simplified tax regimes

Ecuador (2008/22)	Régimen simplificado para emprendedores y negocios populares (RIMPE) combines Income and VAT Sales < USD 20,000/y: fixed rate Sales < USD 300,000/y: progressive brackets
Guatemala (1992/2012)	Régimen de pequeño contribuyente combines Income and VAT. Units pay 5% of VAT on the basis of monthly sales. No need for detailed accounting. Electronic invoicing required. Geolocalization

They substitute one or more taxes (income, VAT) with the objective of reducing the administrative burden and facilitating compliance to economic units which have:

- a) Low income
- b) High number and difficult reach
- c) Low organizational capacity
- d) High mobility (or low survival)

+ Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Dominican Republic, Honduras, Mexico, Nicaragua, Peru, Paraguay and Uruguay

► Some have gone further and added social security contributions

Argentina (Monotributo)

- Fixed rate combines income tax, VAT (3-800 USD/m) and social security contributions (26-140USD/m)
- Eligibility if monthly sales up to USD 60,000/year. Self-categorization into one of 11 Brackets
- +Monotributo Promovido, Monotributo Social
- Offers coverage for old-age, disability, maternity, illness
- 2,2M beneficiaries (>10% of workforce)

Brazil (SIMPLES)

- Combines 8 taxes and social security contributions
- Eligibility if monthly sales up to 70.000 USD / year
- Offers coverage for old-age, disability, maternity, illness
- Social security contributions are subsidised under MEI and overall contributions are 5% vs. 20% for general scheme
- 22,3M beneficiaries (>20% of workforce)

Uruguay (Monotributo)

- Scope limited to specific economic activities and annual income <55,000 USD
- Offers coverage for old-age, disability, maternity; health requires additional payment

► With several objectives in mind and an active role for tax authorities

Expand the tax base, simplify procedures and administration

- Like in any simplified tax regime

Provide a stepping stone to formalization

- Become a transitional stage for economic units to graduate from and enter the general tax and social security regime

Expand social security coverage

- Capitalize on the adoption of simplified tax regimes to extend social security coverage

Tax authorities either collect directly and then distribute to social security agencies or viceversa. Tax authorities were instrumental in the design and implementation which was usually led by the Finance Ministries.

Adds an indirect, social role to tax authorities' mandate

They have effectively formalised and extended social security to a large number of enterprises and own-account workers

Large number of workers now covered by social security in ARG

Source: Based on data from the Boletín Estadístico de la Seguridad Social

They have effectively formalised and extended social security to a large number of enterprises and own-account workers

Large number of workers now covered by social security in BRA

Source: Based on data from
<https://www8.receita.fazenda.gov.br>

► They have effectively formalised and extended social security to a large number of enterprises and own-account workers

There is an evident value-for-money case for beneficiaries

- Social security benefits are explicitly or implicitly subsidised, which strengthens the principle of solidarity in social security
- BRA: 5% vs 20% contribution rate in SIMPLES with a government subsidy in MEI to receive old-age/disability/sickness benefits and health coverage
- ARG: The majority of monotributistas contribute USD 26 / months for health/disability/sickness and an old-age pension
- Impact on the sustainability of social security schemes needs to be followed closely, yet this semi-contributory scheme may be less costly than full-fledged informality and non-contributory pensions/health
- Risk of creating second-class benefits (URY)

► In Uruguay, users value the legitimacy and access to markets

For example, now, this year I'm working almost the same as before I had it, but I'm earning more. Formalization allowed me to reach another type of clientele.

It went really well for us, because it opened up the possibility of participating in markets, exhibitions, events, which required you to have a formal company. And, at the same time, it offered you better marketing opportunities. And, also, because we could work with other payment methods.

And, as a secondary motivation, access to social protection.

► However, revenue mobilization and transition to full-fledged formalization has been weak

ARG: < 0.2% of public revenue, < 0.05% GDP

No transition to full-fledged formalization

- Most people remain in the scheme, self-categorization is generally voluntary
- Costly to move up within the scheme and even more costly to graduate
- Limited capacity to verify adequate categorization
- Limited support to economic units to increase productivity and graduate

► The take-away point

The monotax (or simplified tax regimes with social security contributions) is an effective tool for the expansion of (semi) contributory social security coverage with an important role for tax collection agencies.

It is highly valued by users. If designed correctly, it can be a stepping stone to regular formal treatment, but it more commonly results in a group of beneficiaries that remain in that second-class or subsidised status.

It is not a relevant domestic resource mobilization strategy, but does expand the range of tools available to show the value-for-money of tax and social security compliance.

Design and simplicity is fundamental (Colombia tried to implement, but then dismantled)
